

Eccentric Eliminators

11-Position Eccentric Adjustment Eliminator Plate Kit

Our bolt-on eccentric eliminator plate kit directly replaces the factory lower control arm mounting hardware on some 1960's and 1970's Ford/Mercury vehicles equipped with cam bolts. The round exterior of the factory hardware does little to prevent rotation of the eccentric plate and, can allow the lower control arm position to shift when subjected to heavy loads or impacts. Our updated square shape securely indexes the eliminator plate preventing any chance of rotation and altered alignments. Eliminator plates are laser-cut from 1/4" thick steel, feature three 1/2" mounting holes, and are zinc plated. Various combinations of plate orientation and selected mounting holes enable eleven different mounting positions within a five degree camber adjustment range. Grade 8 mounting hardware is included.

Features

- 3-holes allow 11 different positions for lower control arm
- 5 degree range of camber adjustment in 1/2 degree increments
- Laser-cut 1/4" thick steel
- Grade 8 mounting hardware
